EXPERIENCE THE PERFECT FIT

Why is our expanded portfolio of CAD/CAM & Digital Imaging products the right fit for your practice? For starters, you can expect to see improved diagnostics, optimized workflows, increased profits, and satisfied patients from day one. Not to mention, these solutions are also designed to meet almost any procedural requirements and price point—giving you the peace of mind to take your practice to the next level.

Prepare, capture, send - digital impression-taking is simple and easy to integrate into your practice.

Increase your chances of attracting patients who decide consciously in favor of high-quality dental prostheses.

PROGRAM DETAILS

Open House demonstration of the Trios, Itero & Cerec Scanners and how to send cases to Bayou State Lab.

- 1 Would you like to attract patients interested in high quality restorations?
- 2 Have you often wondered if implementing a digital work-flow into your practice would benefit your practice?

Provide greater comfort and shorter treatment times while providing your patient with a wide array of restorative options and predictable results.

WHAT YOU WILL LEARN

- 1 Learn how to operate the major IO Scanners and how to take precise digital impressions.
- 2 Observe a demonstration on how to scan, check and send files to Bayou State Lab.
- 3 Understand how collaboration with Bayou State Lab can simplify the restorative process.
- 4 Discover how to fit an IO Scanner in to your office work-flow.
