Dr. Leif Stromberg

WHO SHOULD ATTEND?

This program is suited for dental professionals dedicated to treating the prosthetic needs of edentulous individuals. This is a basic and intermediate program for dentists and dental lab technicians, and is advanced for dental assistants.

ABOUT THE INSTRUCTOR

M. Leif Stromberg, DDS, MAGD enjoys practicing restorative dentistry in Dallas, Texas, at Preston Hollow Specialists. He has written a textbook on advanced techniques for predictably successful dentures, and his presentations at many dental conferences have contributed to the quality of dentistry throughout the United States over the years.

Dr Stromberg has been selected by his peers for inclusion in Texas Monthly Magazine as a Texas Super Dentist 13 times (2005-2017) and has been inducted into the Texas Super Dentist Hall of Fame. In 2022 he was nominated for the prestigious Texas Dentist of the Year Award.

Dr Stromberg served as a clinical assistant professor in the Department of General Dentistry at Baylor College of Dentistry - A Component of Texas A & M University Health Sciences Center [now Texas A & M College of Dentistry] in Dallas from 2000 through 2005.

COURSE DESCRIPTION

LIVE LECTURE

This one-day denture course addresses fundamental principles and techniques for fabrication of complete dentures.

Implementing these fundamentals into your practice should lead to better quality edentulous restorations, increased patient acceptance of new complete denture restorations, more fulfillment for the dental team fabricating dentures, and increased treatment efficiency and decreased the time required to fabricate and adjust dentures.

This **Live Lecture** is divided into 5 Modules with opportunities for interaction and Q & A.

MODULE DESCRIPTIONS

ONE-DAY / 5 MODULES

MODULE 1 Addresses why dentures are unpredictable and how to improve predictability and success. Oral exam/consultation; wants and expectations of the patient.

MODULE 2 How to make final impressions more easily and determine posterior borders of dentures.

MODULE 3 Determine vertical dimension of occlusion, centric relation, and acceptable tooth positions. Recording accurate bite records more easily.

MODULE 4 Wax try-in and patient acceptance, processing dentures with injection processing.

MODULE 5 Delivery of complete dentures and adjusting occlusion more accurately and easily.
